

Simple commands in Linux – 2

Multiple uses of / is as good as one
The root folder / is its own parent

ls

- Short and long forms of options
- Interpretation of directory as an argument
- Recursive listing
- Order of options on command line

Knowing files better

- less
- wc
- head
- tail
- cat
- more

Knowing more commands

- `man`
- `which`
- `apropos`
- `info`
- `whatis`
- `help`
- `type`

Multiple arguments

- Second argument
- Interpretation of last argument
- Recursion assumed for **mv** and not **cp**

Links

- Hard links
- Symbolic links

File sizes

- `ls -s`
- `stat`
- `du`
- Role of block size

In-memory filesystems

- /proc
- /sys
